Windows MB-45

Modern aluminium system that allows to create diverse interior design.

Features

1. Modern and stable aluminum profile allows to achieve the effect of one surpace frame and the sash on the outside, after the window has been closed.
2. Possibility to customize the interior as a result of the wide RAL colour range.
3. The system is compatible with other aluminum systems in DRUTEX offer.
4. The system allows to apply one- or two- glass packages.
5. Tightness is ensured by the use of special seals made of synthetic rubber EPDM that guarantees lond lasting of the material.
6. A significant advantage of MB-45 system is the possibility to bend profiles, i.a. the frames and sashes, which enables to produce various types of arch structures.
7. High comfort of usage and the minimal need for maintenance, and long durability.
