Windows MB-70HI

The modern aluminum system used for production of exterior architectural elements that require thermal and acoustic insulation.

Features

1. Window in MB-70HI system may be used both in individual assembly and in aluminium facades
2. High thermal insulation with special insulating inserts application.
3. Very good heat transfer coefficient U thanks to the application of thermal separators and gaskets
4. Wide selection of colours in standard range will satisfy the most demanding clients.
5. Profile shape allows to obtain slender and durable window and door structures.
6. Tightness is ensured by the application of special seals made of two-component synthetic rubber EPDM, solid and cellular, that guarantees long lasting usage and very good thermal insulation.

Technical data

Spacer frame	Steel galvanized frame in standard. Optionally Swisspacer Ultimate available in various colour options.
Fittings	Maco Multi Matic KS in standard two anti-burglary bolts. Window also has a blockage against handle misplacement and a sash lift *; micro-ventilation in a slot **; *Depending on the window height **for tilt and turn windows
Colour range	According to the RAL color range and wood-grain coating from Aluprof ColorCollection
Profile	Windows in MB-70 and MB-70HI systems may be used both in individual assembly and in aluminum facades
Glass	Glass packages up to 50mm. One-chamber glass package with thermal transmittance of $U_g=1,0 \text{ W}/(\text{m}^2\text{K})$ according to PN-EN674 in standard. The possibility to apply a three-glass package of $U=0,5 \text{ W}/(\text{m}^2\text{K})$ coefficient or four-glass with krypton of $U=0,3 \text{ W}/(\text{m}^2\text{K})$. Glass with enhanced sound insulation, tempered, safety, anti-burglary, ornament, solar protective available.
Gaskets	Glass and cover gaskets made of EPDM. The central gasket made of two-component: synthetic rubber EPDM, solid and cellular
